

JOB DESCRIPTION

JOB DETAILS	
Job Title	Assistant Research Associate
Reports to	Senior Research Associate
Band	5
Department/Directorate	NIHR Regional Research Delivery Network (RRDN) SWP / Research & Development
Base	Contractual base can be either Truro, Plymouth, Exeter or Taunton, with regular travel to local and regional offices required

JOB PURPOSE

From October 2024, the current NIHR Clinical Research Network will be changing to become the NIHR Research Delivery Network (RDN). The RDN will build on the successes of the CRN in supporting the effective and efficient initiation and delivery of funded research across the health and care system in England for the benefit of patients, the health and care system and the economy. The RDN will support:

- Clinical trials and other well-designed health and social care research studies (including studies that are delivered outside of an NHS setting);
- Public health studies that require the recruitment of individuals within an NHS setting (that is, acute, ambulance, mental health, community or primary care) or an episode of care which involves contact with the NHS.

The RDN is a new organisation with new structures, governance and ways of working. Study delivery in England will be supported through 12 NIHR Regional Research Delivery Networks (RRDNs). These will work with the national Coordinating Centre (RDNCC) and the Department of Health and Care to provide a joint RDN leadership function via the RDN Board, so that the NIHR RDN as a whole, functions as a single, transparent organisation with a shared vision and purpose. Royal Devon University Healthcare NHS Foundation Trust will be the Host Organisation for the South West Peninsula (SWP) RRDN region. The NIHR RRDNs will have three key roles which it will fulfil via new models of service delivery and functions, to:

- provide support to research sites to enable the effective and efficient initiation and delivery of funded research across the health and care system in England;
- enable the strategic development of new and more effective research delivery capability and capacity. This will include bringing research to under-served regions and communities with major health and care needs;
- work jointly with the Coordinating Centre in the strategic oversight of the NIHR RDN. This will ensure that the Portfolio is maintained as a cohort of high-quality, fully-funded, viable and deliverable studies. It will also ensure that the NIHR RDN as a whole serves the research delivery needs of investigators and R&D teams and is responsive to the changing domestic and global environment for health and care, life sciences and health research.

The NIHR RRDNs will need to develop excellent relationships with the organisations commissioning and providing health and social care across their regions, which are mapped onto NHS regions and Integrated Care Systems. They will help support research undertaken by those providers and at sites across the region, and promote research meeting the needs of local populations. NIHR RRDNs will work together with an RDN Coordinating Centre to support health and care research delivery for the benefit of patients, the health and care system and the economy as a whole.

Local Information

The NIHR Regional Research Network South West Peninsula (NIHR RRDN SWP) is formed from partner organisations in Somerset, Devon, Cornwall and the Isles of Scilly covering a population of

approximately 2.2 million. The region includes a range of health and care providers across the South West including acute, mental health, community, primary care, social care and public health.

All the NHS Trusts are currently engaged with and recruiting to NIHR Portfolio research studies and key relationships have been built with other providers of health and care who are also embracing the opportunity to become involved with NIHR research.

For commercial studies the RRDN industry team are the single point of contact for life sciences companies wanting to conduct studies, the team work closely with partners to conduct feasibility, site identification and performance managed studies. The NIHR RRDN industry team works closely with the post holder and clinical experts to ensure studies are both feasible and eligible to enter the portfolio. The RRDN will support studies from pharmaceutical companies, biotech and medical device companies, using processes and systems, which are consistent across RRDNs.

The region benefits from a 'prime site' relationship with IQVIA, the largest international Contract Research Organisation. The region is also active with many other commercial partners across a breadth of specialty areas.

- To use relevant knowledge to support staff in the primary care, community, non-NHS and acute settings to identify and set up high quality National Institute of Health Research Studies.
- The post holder will support the safe conduct of research in accordance with the Research Governance Framework, and in accordance with good standards and guidelines and to provide assurance that the rights, safety and well-being of participants are protected.
- Liaise directly with researchers across the health community, offering assistance with aspects of study set-up and delivery.
- The post holder will work with the Agile Delivery Team, Senior Nurses, Research Delivery Managers, and NHS providers to ensure research is supported across the health community.

The post will require regular travel within the South West Peninsula region

KEY RESULT AREAS/PRINCIPAL DUTIES AND RESPONSIBILITIES

Works within the Agile Delivery Team to support the set up and delivery of research across the health community.

Work with the Senior Research Associate to provide support for study set up in primary care, community and non-nhs settings.

Manage specific projects which promote and share good practice across the health community.

Distribute and keep updated the research team protocols and pertinent trial information to partner organisations to support research set up.

The ARA will assist in the identification of suitable studies and advise on the appropriate dissemination of Expressions of interest.

Attend local, regional and national meetings as required.

As the post holder will cover a number of Partner Organisations and will be working across the health community there will be a requirement to travel around the region on a regular basis

Support research staff in patient recruitment.

Ensure timely set up of studies in primary care, non-NHS, community and acute healthcare settings.

Ensure robust expressions of interest process to ensure that primary care, community and non-NHS support the set up and delivery of studies across the health community.

Undertake other duties commensurate with grade and expertise as delegated by the Senior Research Associate.

Participation in meeting with other centres involved in studies and attending investigator meetings to update knowledge and share data.

Undertake other duties commensurate with grade and expertise as delegated by the Senior Research Associate.

KEY WORKING RELATIONSHIPS

Areas of Responsibility:

The post holder is required to deal effectively with staff of all levels throughout the Trust as and when they encounter on a day to day basis

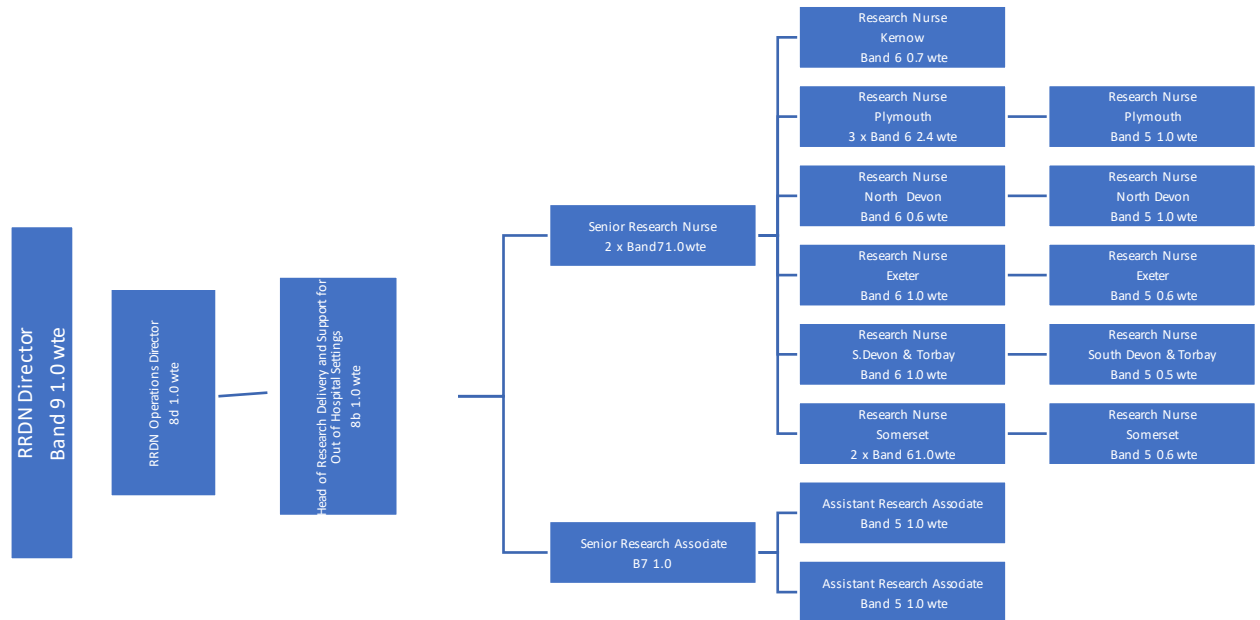

In addition, the post holder will deal with the wider healthcare community, external organisations and the public.

This will include verbal, written and electronic media.

Of particular importance are working relationships with:

- Directors in the RRDN
- RRDN Workforce and People Senior Manager
- RRDN Head of Research Delivery and Support for out of hospital settings manager
- RDN Agile Research Delivery Teams
- RRDN research Delivery Organisations (organisations delivering RDN portfolio research)

ORGANISATIONAL CHART

FREEDOM TO ACT

Work autonomously and escalate specific issues to the Senior Research Associate as required. To work without close supervision and adhere to Clinical Governance initiatives, Code of Professional Conduct and hospital policies. Adhere to the ICH guidelines for GCP, study specific Standard Operating Procedures (SOPs) and RRDN SOPs

COMMUNICATION/RELATIONSHIP SKILLS

Excellent communication skills and the ability to convey and receive complex information. Develop good relations with clinical colleagues across the NIHR RRDN SWP region so as to engender a positive research environment and promote the NIHR portfolio. Develop good working relations with the Primary care practices supported through the Research Delivery infrastructure, particularly the Level 1 and Level 2 practices. Communicate sensitive information about projects and assist with presentations to clinical teams

ANALYTICAL/JUDGEMENTAL SKILLS

Assess the needs of researchers across the health community in terms of project support and delivery. Support the progress of on-going studies and escalate issues to the Senior Research Associate and Head of Research delivery and support for out of hospital settings manager.

PLANNING/ORGANISATIONAL SKILLS

Contribute to the NIHR RRDN SWP planning process and other reporting processes as required.

PATIENT/CLIENT CARE

Deal with enquiries from Health care professionals, patients and carers.

POLICY/SERVICE DEVELOPMENT

The ARA will actively monitor progress with the research nurses for studies within allocated divisions and primary care geography, developing plans where necessary to improve recruitment where performance is poor.

FINANCIAL/PHYSICAL RESOURCES

Support the identification of resources required to deliver the studies in primary care and non-NHS and other provider organisations.

HUMAN RESOURCES

Deliver education events to ensure all staff received appropriate training and support for study delivery including the support of systems and service improvement initiatives for research delivery.

INFORMATION RESOURCES

Undertake accurate data entry using computerised and/or paper-based systems.
Assist in the preparation of accurate study reports and presentations.
To handle appropriately any personal, sensitive or confidential information.
Keep clear, concise records in terms of subject documentation and essential tracking information to support performance management.
Participate in research meetings and ensure accurate information is held on study pipeline, set up and delivery

RESEARCH AND DEVELOPMENT

Contribute to the NIHR RRDNSWP planning process and other reporting processes as required.
Ensure robust expressions of interest process to ensure that primary care, community and non- NHS support the set up and delivery of studies across the health community.

PHYSICAL SKILLS

The ARA will be able to receive, handle, analyse and resolve queries promptly. Direct unresolved queries to appropriate team member.
Be able to be persuasive, motivational and negotiate on complex or sensitive issues.
Encourage clinical teams in primary, community and acute settings to take part in clinical trials by emphasising the importance of research.

PHYSICAL EFFORT

Frequent periods of sitting due to VDU use
Regular need to travel across South West Region
Rare need for manual handling of equipment

MENTAL EFFORT

Data accuracy and IT skills are essential to this role and can require frequent long periods of concentration.
Postholder will need to be able to prioritise workload even when frequently interrupted and under pressure.

EMOTIONAL EFFORT

Promote a blame free culture in reporting incidents and where appropriate support local investigation of incidents.

WORKING CONDITIONS

Remote working on occasions
Regular travel across South West Peninsula

OTHER RESPONSIBILITIES

Take part in regular performance appraisal.

Undertake any training required in order to maintain competency including mandatory training, e.g. Manual Handling

Contribute to and work within a safe working environment

You are expected to comply with Trust Infection Control Policies and conduct him/herself at all times in such a manner as to minimise the risk of healthcare associated infection

As an employee of the Trust, it is a contractual duty that you abide by any relevant code of professional conduct and/or practice applicable to you. A breach of this requirement may result in action being taken against you (in accordance with the Trust's disciplinary policy) up to and including dismissal.

You must also take responsibility for your workplace health and wellbeing:

- When required, gain support from Occupational Health, Human Resources or other sources.
- Familiarise yourself with the health and wellbeing support available from policies and/or Occupational Health.
- Follow the Trust's health and wellbeing vision of healthy body, healthy mind, healthy you.
- Undertake a Display Screen Equipment assessment (DES) if appropriate to role.

GENERAL

This is a description of the job as it is now. We periodically examine employees' job descriptions and update them to ensure that they reflect the job as it is then being performed, or to incorporate any changes being proposed. This procedure is conducted by the manager in consultation with the jobholder. You will, therefore, be expected to participate fully in such discussions. We aim to reach agreement on reasonable changes, but if agreement is not possible, we reserve the right to insist on changes to your job description after consultation with you.

Everyone within the Trust has a responsibility for, and is committed to, safeguarding and promoting the welfare of vulnerable adults, children and young people and for ensuring that they are protected from harm, ensuring that the Trusts Child Protection and Safeguarding Adult policies and procedures are promoted and adhered to by all members of staff.

PERSON SPECIFICATION

Job Title	Assistant Research Associate
------------------	------------------------------

Requirements	Essential	Desirable
QUALIFICATION/ SPECIAL TRAINING		
Degree level qualification (or vocational health / science qualification and significant relevant experience)	E	
Trained in Good Clinical Practice		D
IT Qualification (e.g. CLAIT)		D
KNOWLEDGE/SKILLS		
An understanding of the clinical research process including Good Clinical Practice and research governance	E	
Proven project management skills	E	
Excellent IT / Internet/MS Office skills	E	
Able to work without close supervision	E	
Able to prioritise workload to respond to the changing demands of the service	E	
Understanding of data collection, entry and validation	E	
Understanding of caring for patients and volunteers	E	
Understanding of data collection and data entry	E	
EXPERIENCE		
Previous research co-ordination experience	E	
Experience in a clinical role e.g. auxiliary/nurse		D
Experience in handling tissue/blood samples		D
Experience of obtaining informed consent		D
Experience or working with databases and using reporting tools		D
Previous experience of auditing and monitoring research or the Management / administration of clinical trials		D
PERSONAL ATTRIBUTES		
Remain calm in stressful situations	E	
Ability to work in multidisciplinary team	E	
Ability to work independently without close supervision	E	
Willingness to develop clinical skills (e.g. venepuncture and to handle operative tissue)	E	
Excellent interpersonal and communication skills	E	
Ability to plan prioritise and manage deadlines	E	
Ability to work calmly and effectively under pressure	E	
Accuracy to attention and detail	E	
Reliability and flexibility.	E	
OTHER REQUIREMENTS		
Flexible to the requirements of the role	E	
Committed to further professional development	E	
Ability to travel to other locations as required.	E
