

JOB DESCRIPTION

JOB DETAILS	
Job Title	Clinical Lead Physiotherapist – Pelvic Floor Dysfunction
Reports to	Head of Acute Physiotherapy
Band	Band 7
Department/Directorate	Specialist Services

JOB PURPOSE

The post holder is responsible for the clinical leadership and management of the physiotherapy provision to support the delivery of assessment and intervention for women with pelvic health dysfunction across Eastern services.

The post involves providing a high standard of clinical service, performing advanced assessment of patients including those with highly complex presentations and from this formulating a diagnosis and treatment plan, carried out as an autonomous practitioner. The post holder will have acquired specialist knowledge of female lower urinary tract / bowel dysfunction, pelvic pain and obstetric-related musculoskeletal conditions

The post holder will provide professional expertise and collaborate with the Head of Physiotherapy and colleagues in planning, co-ordinating, delivering and evaluating the specialist service and area of specific clinical specialism to ensure a high standard of specialist service provision. To link with the relevant Professional Lead as required. They will implement, monitor and evaluate Clinical Governance within specialist field, specifically looking at best practice and national guidelines, auditing, service evaluation and research.

They will provide a countywide clinical leadership role that supports staff clinically, professionally, and educationally in the specialist area.

The role is based across the Eastern service working closely with the service in the North.

There will also be some wider Therapy Department responsibilities. Caseloads will be flexible and at times will involve the provision of service to other areas of the Trust.

KEY RESULT AREAS/PRINCIPAL DUTIES AND RESPONSIBILITIES

- To undertake highly specialist assessment of patients, including those with diverse or complex presentations/multi pathologies, as an autonomous practitioner, utilising specialist skills and advanced clinical reasoning.
- To lead training of maternity staff (alongside the Pelvic Health Midwifery lead) and primary care in teaching simple pelvic floor muscle exercises (PFME) within routine care of perinatal women.
- To aid with the development of risk assessment pathways and one-point access to services of perinatal women with pelvic health concerns across Devon.
- The post holder is responsible for ensuring effective communication pathways exist between all internal and external agencies associated with the provision of effective quality care and its delivery.
- The post holder is required to represent their service by attending appropriate meetings aimed
 at developing effective working relationships with colleagues within all clinical areas and which
 encourage joint working and the sharing of good practice amongst the multidisciplinary team.
- To deliver the project plan as determined by the Local Maternity & Neonatal System and Perinatal Pelvic Health Service Board.

KEY WORKING RELATIONSHIPS

This post will work directly with the Pelvic Health Midwife and report performance and outcomes as required to the Pelvic Health Project, and liaise re additional referrals / complex patients with the Clinical Lead Physiotherapist for Women's Health.

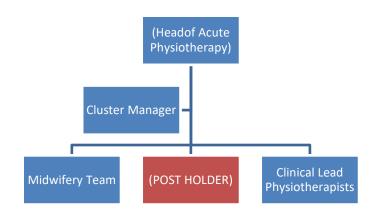

There will be no direct reports to the post but the post-holder will provide supervision and support for less experienced staff and student s as required.

Of particular importance are working relationships with:

Of particular importance are working relationships with:

Internal to the Trust	External to the Trust		
 Head of Acute Therapy Services Head of Acute Physiotherapy Midwives WH Physiotherapy team Consultants, Medical Staff, ward managers and nursing staff 	 Devon-wide PPHS project team and clinical colleagues across Devon GPs Social Services staff 		

ORGANISATIONAL CHART

FREEDOM TO ACT

- Responsible for ensuring confidentiality is maintained at all times in accordance with the data protection act, Trust policy and good practice.
- To undertake a very high standard of Physiotherapy assessment, diagnosis and treatment, this may include highly complex cases, as an autonomous practitioner.
- Implements policies and standards as part of the project.

COMMUNICATION/RELATIONSHIP SKILLS

- Be able to motivate and engage patients with a range of complex conditions/disabilities to work with treatment programmes and work towards treatment goals.
- Assess patient understanding of treatment proposals, gain valid informed consent and have the capacity to work within a legal framework with patients who lack capacity to consent to treatment.

- Use a range of verbal and non-verbal communication tools to communicate effectively with patients and carers to progress rehabilitation and treatment programmes. This will include patients and carers who may have difficulties in understanding or communicating. For example, patients may be dysphasic, depressed, deaf, and blind, have a learning disability or who may be unable to accept diagnosis.
- Managing patients with chronic pain and dealing with patients who are in difficult social, emotional, or mental health states.
- Dealing with patients, carers and family who may be distressed or angry or confused.
- Treating patients who may have suffered from abuse.
- Occasionally delivering unwelcome news to staff and dealing with disciplinary and grievance procedures
- To provide specialist advice on patient care to other health, social, educational and voluntary sector services, when necessary, as part of patient care. This may involve challenging or requesting changes to treatment programmes/care plans set by other professionals.

ANALYTICAL/JUDGEMENTAL SKILLS

- Use advanced clinical reasoning skills and expertise to provide an accurate diagnosis of their condition
- Interpret and act on investigation results to aid diagnosis and the management plans of patients and link closely with GP's and Consultants around appropriate patient care.
- Evaluate patient progress, reassess, and alter treatment programmes as required.
- Analyse clinical and social information from a range of sources and integrate into assessment and development of care plan/treatment plan.
- To be responsible for the safe and competent use of all specialist equipment patient appliances and aids by patients.
- Responsible for monitoring of evidence based therapeutic interventions.
- To manage clinical risk within own patient case load and support more junior staff to do so

PLANNING/ORGANISATIONAL SKILLS

- Responsible for the clinical leadership of the identified teams and ensure that clinical supervision is in place for all staff within trust designated areas.
- To be professionally and legally accountable for all aspects of own work. To hold responsibility for own caseload and be responsible for a defined area of the service or a particular patient type, working without direct supervision.
- Represent service and/or individual patients at multi-disciplinary team meetings, to ensure the
 delivery of a co-ordinated multidisciplinary service, and integrate therapy treatment into the
 treatment programme. This will include discussion of patient care, patient progress and
 involvement in discharge planning.
- Participate in joint working with appropriate experts/agencies

PATIENT/CLIENT CARE

- Ensure the assessment, planning, implementation, and evaluation of the evidence-based care required, including health promotion for this patient group.
- To undertake highly specialist assessment of patients, including those with diverse or complex presentations/multi pathologies, as an autonomous practitioner.
- To use specialist skills to assess and treat patients with complex scenarios within the specialist clinical field and support others to do so.
- Use advanced clinical reasoning skills and expertise to provide an accurate diagnosis of their condition.
- Formulate and deliver an individual treatment programme based on a sound knowledge of evidencebased practice and treatment options using clinical assessment, reasoning skills and knowledge of treatment skills.

- Deliver programmes of supported patient self-management, in ways that facilitate behavioural change, optimise individuals' physical activity, mobility, fulfilment of personal goals and independence, and that minimise the need for pharmacological interventions.
- Formulate accurate prognoses and recommend best course of intervention, developing comprehensive discharge plans and setting personalised goals for each patient.

POLICY/SERVICE DEVELOPMENT

- Evaluate service provision and develop evidence-based practice, progressing change as needed, within own service area.
- Critically appraise evidence from diverse sources to make informed judgements about its quality and application to practice.
- To work to professional standards as set by the Trust, the HCPC and the Chartered Society of Physiotherapists.
- Responsible for commenting on and the development where appropriate of trust and clinical policies within their sphere of responsibility.
- Represent the organisations in the development of clinical local, regional, and national strategies and guidelines where required

FINANCIAL/PHYSICAL RESOURCES

 To work closely with the Head of Physiotherapy to ensure equipment and resource levels remain appropriate to maintain service delivery at all times.
 Demonstrating an awareness of the financial restrictions within which the Therapy department operate.

HUMAN RESOURCES

- To lead training of maternity staff (alongside the Pelvic Health Midwifery lead) and primary care in teaching simple pelvic floor muscle exercises (PFME) within routine care of perinatal women.
- Ensure the Trust appraisal process that identifies in conjunction with appraiser your personal development and training needs are in place.
- Responsible for maintaining and conducting oneself in a professional manner towards service users, carers, colleagues, and other agencies.
- To contribute to the clinical supervision/instruction of staff and students working within the clinical area.
- The post holder as an individual is required to understand their responsibility for respecting and promoting issues of equality, diversity in accordance with good practice and legislation.
- To assist in the recruitment of departmental staff (selection and interview) as necessary.
- To actively assist in the smooth running of the whole physiotherapy service throughout the RDUH NHS Foundation Trust.

INFORMATION RESOURCES

- Responsible for ensuring confidentiality is maintained at all times in accordance with the data protection act trust policy and good practice.
- To undertake the keeping of accurate records of patient treatments and statistical data as required and respond to data requests in a timely way.

RESEARCH AND DEVELOPMENT

• To support the team in research, and lead on areas of clinical specialism in service modernisation, clinical governance, and the National Service Framework Policy Implementation guidance.

PHYSICAL SKILLS

- To undertake internal (vaginal / anorectal) examinations of female patients for Pelvic Floor Dysfunction (PFD) specialty.
- To use specialist palpation skills to assess and treat patients with pelvic floor dysfunction.
- To be computer literate and able to use electronic systems.

PHYSICAL EFFORT

- Frequent sitting or standing in difficult positions throughout shift.
- Frequent handling of bariatric patients and patients with reduced mobility requiring maintenance of up to date manual handling training to enable advanced patient handling

MENTAL EFFORT

- Frequent concentration during assessment and treatment and analysis of outcomes of interventions
- Planned caseload

EMOTIONAL EFFORT

• Frequently supporting patients with the distressing or emotional impact of bladder/bowel incontinence, sexual dysfunction and chronic pain.

WORKING CONDITIONS

Exposure to body fluids
